PROFESSIONAL SUMMARY

Full Stack AI Developer with hands-on experience building scalable FastAPI and React.js applications, RESTful APIs, NLP pipelines, RAG systems, and multi-agent AI tools. Skilled in Python, Java, JavaScript, SQL, machine learning, database design, and production-oriented software development. Strong foundation in data structures, OOP, backend development, API integration, and AI-powered application development.

EDUCATION

Presidency University

Master of Computer Applications (MCA) — CGPA: 7.1

Graduating in July 2026

Bengaluru, Karnataka

Vidyavahini First Grade College

Bachelor of Computer Applications (BCA) — CGPA: 7.3

Nov 2021 – Aug 2024

Bengaluru, Karnataka

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML5

Core CS & AI/ML: Data Structures, OOP, System Design, REST APIs, NLP, RAG, Transformers, LSTM, Scikit-learn, TensorFlow, PyTorch, OpenCV, NumPy, Pandas

AI Frameworks & Tools: LangChain, Hugging Face, OpenAI API, Multi-Agent Systems, FAISS, ChromaDB, LLM Tool Calling

Web & Databases: FastAPI, React.js, Node.js, Flask, PostgreSQL, MySQL, RESTful APIs, JWT, WebSockets

Developer Tools: Git, GitHub, Docker, VS Code, Jupyter, Google Colab, Anaconda, Agile

PROFESSIONAL EXPERIENCE

Zetacoding Innovative Solutions

Feb 2026 – May 2026

Full Stack AI with Python Intern

Bengaluru, Karnataka

- Built InsightLoop, a production-grade B2B SaaS platform for AI-powered customer feedback analysis using FastAPI, React.js, PostgreSQL, VADER, KeyBERT, and LSTM; processed 10,000+ feedback records with end-to-end ML pipeline from ingestion to insight delivery
- Engineered multi-model NLP pipeline combining sentiment analysis (VADER), keyword extraction (KeyBERT), and LSTM-based trend forecasting; achieved 88%+ sentiment classification accuracy across product categories
- Designed interactive React dashboard with real-time sentiment trends, topic clusters, and business insight cards; reduced manual feedback review time by 65% for client teams
- Developed Bitcoin Price Direction Prediction system training 5+ algorithms (LSTM, Linear Regression, Random Forest, SVM, Logistic Regression); Random Forest achieved highest accuracy at 87%; built Flask UI for real-time prediction visualization

EduPhoenix Solutions

May 2024 – Jun 2024

Full Stack Developer Intern

Bengaluru, Karnataka

- Developed responsive MERN web applications including a food-ordering platform with authentication, order tracking, and third-party payment integration
- Engineered an airline booking system with admin/user dashboards, JWT authentication, multi-filter flight search, and MySQL-backed booking workflows using PHP, Java, and MySQL

TECHNICAL PROJECTS

AgentOS

2026

Python, FastAPI, React.js, WebSockets, Multi-Agent Orchestration

- Designed a multi-agent orchestration platform with supervisor-agent architecture, dynamic task delegation, parallel execution, and real-time reasoning trace visualization over WebSockets
- Built a React live reasoning dashboard for agent thought chains, tool calls, and decision trees; reduced debugging time by 70% through transparent execution traces

AgentMesh

2026

Python SDK, REST APIs, LLM Tool Calling, Agent Protocols

- Developed a Python SDK for composing heterogeneous AI agents with tool registration, inter-agent messaging, and LLM-driven orchestration for plug-and-play agent workflows
- Designed async SDK architecture supporting OpenAI, Anthropic, and Ollama backends; achieved sub-200ms agent-to-agent message latency with queued task execution

Research Assistant AI Agent

2025

Python, LangChain, OpenAI API, Flask

- Built an autonomous research assistant using LangChain, OpenAI API, Flask, document analysis, citation tracking, and natural-language search; reduced manual research time by 70%

ACHIEVEMENTS & CERTIFICATIONS

State-Level Hackathon — "Namma Suraksha"

Apr 2025

IEEE, Karnataka Govt., Karnataka Police

- Selected among top teams from 500+ participants; architected a MERN women-safety application with encrypted evidence submission, real-time case tracking, automated warning flows, and police database integration

Certifications: TCS iON Career Edge - Young Professional | Python Bootcamp (Udemy) | Data Science, ML, DL & NLP Bootcamp (Udemy)

CORE COMPETENCIES

Full Stack Development | AI/ML Engineering | NLP & RAG Systems |

Multi-Agent Orchestration | REST API Design | MLOps | System Design |

Real-Time Data Pipelines | LLM Integration | Cloud-Ready Deployment
